                                                                                                                                                                                                        -!- SUBUNIT: Associates with TRAFI.
-!- SUBCELLULAR LOCATION: Type I membrane protein (Probable).
-!- ISSUB SPECIFICITY: Highest levels are in spleen, lymph node, thymus, peripheral blood leukocytes, bone marrow and fetal liver. Very low levels in skeletal muscle, testis and colon. Not detected very low liver.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Gaps

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

genome polyprotein - plum pox virus (strain D)
N;Contains: 29K protein; 34K protein; coat protein (capsid protein); cylindrical inclusic C;Species: plum pox virus; PpV
C;Species: plum pox virus; PpV
C;Species: plum pox virus; PpV
C;Spacession: S06929; JA0078
R;Teycheney, P.Y.; Tavert, G; Delbos, R.; Ravelonandro, M.; Dunez, J.
Nucleic adds Res: 17, 10115-10116, 1989
A;Title: The complete nucleotide sequence of plum pox virus RNA (strain D).
A;Reference number: S06929; MUID:90098790; PMID:2602121
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          A.Accession: JA0078
